

I'm in support of having ASL to Spanish VRS services for personal and professional uses. I sign ASL but have Spanish speaking family that don't speak English well. This would help me communicate with my loved ones.

And I know I'm not the only one but there are many others as well.

I also work for DCARA as a client support specialist and I know a lot of my clients who are deaf Latinos that come from Spanish speaking families but they don't know Spanish themselves due to their deafness as a barrier would benefit from this tremendously.

Please support this.

Thank you
